

~~CONFIDENTIAL~~

APPENDIX A

AUGUST 1956

CURRENT REPORTING PROGRAM OF THE
FOREIGN DOCUMENTS DIVISION

1. USSR (nonscientific)

A. Political-Sociological

1. Organization, functions, and activities of the ministries and governmental departments on the various levels, including changes and reorganizations.
2. Organization, functions, and interactions of the Party and Government on local levels, with increased emphasis on parliamentarianism, amalgamation of rural local Soviets, and the primary party organization.
3. Initiation, organization, techniques, and implementation of propaganda campaigns.
4. Territorial-administrative changes.
5. East-West travel and contacts, including cultural and sports delegations, trade fairs, and international conferences.
6. Statistics on and evaluation of undergraduate study programs, with emphasis on graduate courses and degrees offered.
7. Study of the Soviet secondary technical educational system; the technicum and its place in the new ten-year education system.
8. Public Health:
Organization and facilities, training of medical doctors and technicians, the Soviet Red Cross and Red Crescent in coordination with paramilitary organizations.
9. Crime:
Comparative analyses of court cases by type of crime, sentence, and geographical distribution of reported crimes.

~~CONFIDENTIAL~~

10. Collective farm system:

Description of system as an institution, organization, administration, chains of command, procedures and practices in operations, transition to state farms, relations with MTS, pending changes.

B. Biographic

11. Biographic data -- information on:

- a. Government -- (USSR and Republic level)
Council Chairman and Deputies; Ministers and their deputies; Chiefs and Deputy Chiefs of Main Administrations; other officials directly under Council of Ministers; Officials of Presidium of Supreme Soviets; Officials of judicial apparatus.
Government -- (Oblast and large city level)
Chairman and Deputy Chairman of executive committees of oblast and city soviets; Administrators of agriculture.
- b. Party -- (USSR and Republic) Officials and members of Central Committee and of organs directly under Central Committee; (oblast and large city) Secretaries and members of bureau of Party committees.
- c. Other -- (USSR and Republic) Officials of Trade Union Councils; Consumers' Cooperatives, Komsomol Secretaries, and other mass organizations; newspaper editors; directors of institutes, selected cultural, religious, and scientific figures. (Oblast and large city) Komsomol Secretaries.
Attendance at Moscow diplomatic functions; Inclusive lists of membership in Party or government bodies. Party officials down to the rayon level for congresses and other Party meetings.

C. Military

12. Military:

Personalities: generals, admirals, and other officers; obituaries, editorial commentary, complaints, military districts, fleets, military

APPENDIX A

schools, military books, light aviation, military equipment, theory, tactics, and strategy, airborne supply.

13. Paramilitary:

Identification of MVD, KGB, and DOSAAF organizations and units, their personnel and missions, facilities available to them.

14. Civil defense:

Antiaircraft and antinuclear measures, facilities, training, identification of units.

D. Economic

15. Machine tools:

Production of lathes, drilling and boring machines, grinding machines, lapping, honing, and polishing machines, threading and gear processing machines, milling machines, planing, shaping, and broaching machines, and electrical processing machines, with model designations and technical specifications. Data on plants producing machine tools, cutting tools, and abrasives.

16. Motor vehicles:

Production of motor vehicles and bearings, new models of passenger cars and trucks, with descriptions and technical specifications, organization and technology in motor vehicle and bearing plants, and assembly and motorcycle plants.

17. Tractors and agricultural machinery:

Production of tractors, and of all types of seedbed preparation, planting, tillage, harvesting, and general service machines, descriptions of models with specifications, and information on producing plants.

18. Extraction, Production, and Power Machinery:

Production of coal, peat, and petroleum machinery, metallurgical machinery, presses and forging equipment, foundry machinery, and chemical machinery with model designations and specifications, production of turbines and turbine parts, with indication where possible of power plants for which they are designated, and information on producing plants.

19. **Construction, Transport, and Service Equipment:**
Production of all major types of construction and roadbuilding machinery, dredges, excavators, cranes, and important service equipment such as conveyors, and model designations and plant information.
20. **Electrical Equipment:**
Production of generators, motors, transformers, and other heavy electrical equipment, electric furnaces, welding equipment, wire and cable, and independent power sources, model designations and specifications, information on producing plants, installation equipment, power station control apparatus, and motor vehicle electrical equipment.
21. **Communications Equipment and Instruments:**
Production and development of radio and television receivers, telephone and telegraph equipment, vacuum tubes and light bulbs, electrical and nonelectrical instruments, model designations and specifications, and information on producing plants.
22. **Republic Budgets:**
Data on the state budgets, budget laws, and recommendations of the budget commissions from the official annual releases of the 16 union republics of the USSR.
23. **Republic Plan Fulfillment:**
Data from the official semiannual releases of the 16 USSR republics concerning achievements in industry, agriculture, transport, trade, education, etc.
24. **Foreign Trade:**
Charters of new foreign trade organizations, periodical articles on development of USSR foreign trade, data on personnel authorized to sign trade agreements.
25. **Domestic Trade:**
Expansion, shortcomings, and commodity turnover in the domestic trade network and the system of consumers' cooperatives.
26. **Wages, Prices:**
Wage rates and scales in USSR industry and agriculture. Retail price listings of food and consumer goods.

27. **Finance, Banking, Credit, Cost Accounting:**
Data on ministries of finance, the entire state banking system, budget and bank financing of economic organizations, the currency and credit system, foreign exchange operations, taxation, economic planning, management, and cost-price relationships.
28. **Capital Investment:**
Data on investment in industry by sector, and in agriculture by type and area.
29. **Labor Productivity; Manpower Statistics:**
Indices of labor productivity measurement and various output data by industry and in agriculture. Over-all statistics, annual percentage increases, estimates of productivity potential, and effects of mechanization on labor productivity.
30. **Land Transport:**
New construction, electrification, and physical description of USSR railway systems, their operations, capacities, density of traffic, operational costs and inputs, equipment and rolling stock; motor and urban transport, operations and equipment.
31. **Water Transport:**
Maritime and river transport, organization and operations of steamship lines, capacities and density of traffic, ports and facilities.
32. **Air Transport:**
Organization and operations of civil air fleet, facilities, and equipment.
33. **Arctic Activities:**
Data on USSR Arctic and Antarctic expeditions, drift stations, Arctic ports, exploration, personnel, equipment, meteorological observations, human adaptation to cold, waste disposal, diseases and medical care.
34. **Electric Power:**
Construction and operating capacities and output on national, republic, and oblast levels, plans, labor, materials, and investment in power systems, transmission lines, description of individual power plants with capacity in excess of 5,000 kilowatts.

35. Radio Communications:
Organization and operations of networks, capacities, construction, installation, and improvement of facilities, mechanization, costs, materials, and other inputs, new operational techniques developed in television
36. Telephone and Telegraph Communications:
Same as 34 above.
37. Postal Communications:
Same as 34 above.
38. Construction:
Industrial, city, and agricultural construction plans, investments, costs, labor inputs, and results, new techniques and procedures.
39. Agriculture (Crops):
Areas sown to all crops, quantitative crop production, deliveries to state, plan fulfillments, unusual weather conditions, forestry and timber.
40. Agriculture (Livestock):
Livestock numbers -- increases and decreases, animal products, quantitative production, deliveries to state, plan fulfillments, construction of shelters, types of ownership, mechanization, expansion of facilities, fish industry.
41. Petroleum:
Quantitative production of petroleum and natural gas, drilling methods, processing techniques, distribution of deposits, mechanization, equipment, norms.
42. Solid Fuels:
Quantitative production of coal, peat, shale, extraction and treatment methods and techniques, gasification of coal, use of mining equipment, plan fulfillment.
43. Ferrous Metals:
Ore extraction, quantitative production of iron, steel, and rolled products, production methods, types and grades of products, distribution, plant facilities, plan fulfillments, shop organization.

- 44. Nonferrous Metals:
Same as 43 above, including uses in steel production.
- 45. Chemical Industry:
Quantitative production of raw material, semi-finished, and finished chemical products, production methods and techniques, distribution within USSR of chemical products, biologicals, pharmaceuticals.
- 46. Nonmetallic Minerals:
Extraction methods, quantitative production, plant facilities, uses, replacement of ferrous products by nonmetallic minerals.
- 47. Consumer Goods:
Production of selected manufactured consumer goods, including food and clothing, plant facilities, equipment, processing techniques.

2. Scientific and Technical

A. USSR: All scientific and technical journals available to FDD are being exploited for information in the following fields:

1. Nuclear theory, nuclear instruments, developments in nuclear technology and power, high energy nuclear physics research, cosmic ray experiments.
2. Radio astronomy, radio spectroscopy, communications, interference and countermeasures, electromagnetic wave propagation, radar, electronic navigation aids, target locator equipment and proximity fuzes, television, recording devices, electronic components, infrared, radio frequency heating, underwater acoustics and magnetic, dielectric, and semiconductor materials.
3. Aerodynamics and hydrodynamics, structures and propulsion, fuels and combustion, geophysics, direction and control related to rockets and missiles.
4. Chemistry, handling, and harmful effects of radioactive materials, chemistry of materials used in nuclear energy work, radiation injury, prophylaxis, and therapy related to atomic warfare; epidemiology, pathogens, toxins, prophylaxis, and therapy related to biological warfare; toxic agents, prophylaxis, and therapy related to chemical warfare.

B. Scientific news items from the Sino-Soviet press include the following information:

1. Notes on the physical, earth, medical, natural, electronic, and engineering sciences.
2. Notes on changes in scientific and engineering publications.
3. Information on new units, changes in established agencies in the Organization of Sino-Soviet Science.
4. New scientific personnel assignments and identification, including names, location, and directors of Soviet hospitals; and birthdays, obituaries, travel, conferences, awards, nominations and appointments of Soviet Bloc scientists.
5. Identification and reference to scientific graphic materials.

- C. Titles, authors, and institutional affiliation of USSR dissertations for degrees in science and engineering.

APPENDIX A

3. Eastern Europe

Albania

A. Political-Sociological

1. Party and Government functions and activities at all levels.
2. Organization, functions, and activities of the Democratic Front, the Union of Albanian Women, and the Union of Albanian Working Youth.
3. Subversion and sabotage; economic crimes.
4. Trade union organization, functions, and activities.
5. Statistics on students and educational facilities; workers' training; parent-school relationships.
6. Public health facilities; efforts to improve public hygiene.

B. Military -- all available information

C. Economic

1. Agriculture
 - a. Areas sown to crops, harvests, and unusual weather affecting harvests; the food processing industry
2. Fuels and Power
 - a. Investments in fuels and power installations; production and distribution of fuels and power.
3. Minerals and Metals
 - a. Production and utilization of minerals and metals.
4. Motor vehicle and rail transport.
5. Light Industry
 - a. Aggregates on input and output

APPENDIX A

Bulgaria

A. Political-Sociological

1. Party and Government organization and activities at the local level.
2. Activities of the Fatherland Front, Bulgarian Red Cross, and the DSNM.
3. Crimes against the State, hooliganism, and moral crimes.
4. Population and occupational shifts; the position of women and minorities.
5. Education organization and facilities; statistics on the specialized technical schools; the study of Russian.
6. Public health organization and facilities; training of doctors and medical technicians; the availability of drugs and medicines.

B. Military

1. Military personalities.
2. Editorials on military topics.
3. Nonmilitary employment of military personnel.
4. Tactics, weapons, equipment, and ships.
5. Military and naval organizations, units, and installations.
6. Military and naval districts, schools, training, and sports.
7. Security forces.
8. Paramilitary organizations and activities, and civil defense.

APPENDIX A

C. Economic

1. Agriculture

- a. Areas sown to all crops, harvests, and unusual weather affecting harvests; the food processing industry.

2. Chemical Industry

- a. Investments in the chemical industry, new installations, products, and processes, production figures, manpower, technical difficulties, chemical trade figures.

3. Fuels and Power

- a. Production, consumption, and distribution of fuels and electric power.

4. Machine Building Industry

- a. Plant construction or expansion, new products and technological developments, production figures, product destination, manpower, investments in the industry.

5. Transportation

- a. New motor vehicle and railroad facilities and equipment.

Czechoslovakia

A. Political-Sociological

1. Party and Government policy and activities at local levels, including relations between KSC and non-Party members and between KSC and National Committees; incorrect procedures at basic organizational level of KSC; dangers of cult of personality and bureaucracy at local level.
2. Organization of and cases involving internal security forces.
3. Demographic information; employment opportunities, and employment of women.
4. Educational provisions for youth; adult and specialized education, including scientific; criticisms of educational policy, methods and curriculum; student resistance to educational policies; conferences of educational personnel.
5. Criticisms of the press; new publications and films; writers' conferences.
6. Mass organizations activities, including youth, peace, and other groups.
7. Crime, juvenile delinquency, disaster; standard of living, including social security; health facilities and personnel, education, research, and statistics.

B. Economic

1. Agriculture
 - a. Investments in agriculture, areas sown to all crops, harvests, and unusual weather affecting harvests.
2. Chemical Pharmaceutical Industry
 - a. New installations, products, and processes; production figures.

3. Fuels and Power

- a. Production and consumption of solid fuels and petroleum; planned or actual increases in the production of electric power; electric power consumption.

b. Manufacturing Industries

- a. New construction, or expansion of present industrial facilities; new products and technological developments; production figures.

5. Minerals and Metals

- a. Location and capacity of facilities in use, being constructed, and planned; statistics on production and consumption.

6. Transportation and Communications

- a. Development and production of new types of transport and communications equipment.

East Germany

A. Economic

1. Areas sown to all crops, harvests, and unusual weather affecting harvests, investments in agriculture, decreases on agriculture, the food processing industry.
2. Minerals and Metals
 - a. Location and capacity of processing installations; statistics on production, consumption, investments, prices, and manpower employed.
3. Solid Fuels
 - a. Planned and actual production, consumption, distribution, aggregate stocks, investment.
4. Planned and actual production of electric power.
5. Manufacturing Industries
 - a. Plant construction or expansion; new products and technological developments; production figures; exports; manpower and production problems; planning and plan fulfillment.

Hungary

A. Political-Sociological

1. Party and Government policy and activities at local levels.
2. Modifications of the judicial system.
3. Population changes; labor legislation and policy; employment and wages.
4. Organization of and cases involving internal security forces.
5. Higher and scientific educational facilities; educational reorganizations.
6. Public health facilities and activities; training of personnel.
7. Standard of living.

B. Military -- Same coverage as Bulgaria.

C. Economic

1. Agriculture

- a. Crop planting and harvests; unusual weather affecting harvest; food processing industry.

2. Chemical Industry

- a. New installations, products and processes; capital investment; production figures; plans and plan fulfillment.

3. Fuels and Power

- a. Production of fuels, and capacity increases in electric power; investment in the fuel and power industries.

4. Manufacturing Industries

- a. Primary emphasis on developments within the electronics industry and in locomotive manufacture, to include new products and technological developments, production figures, plant construction or expansion, material input and product destination.

Poland

A. Political-Sociological

1. Trends in party policy and its effect on party organization and personalities, implementation of government and party policy on local level.
2. Organization, growth or decline, and effect of mass organizations upon population.
3. Organization and activities of security and police organizations; incidents or trends reflecting disturbance of internal security.
4. Quantitative and qualitative increase or decrease on all levels of education, but primarily on higher education level. Direction and control of education, primarily on higher education level.
5. Attempts to discredit religion and religious leaders.
6. Extent and control of media of public information for promotion of party and government policy.

B. Military -- Same coverage as Bulgaria.

C. Economic

1. Agriculture

- a. Areas sown to all crops, harvests, and unusual weather affecting the harvests; investments in the agricultural sector; the food processing industry.

2. Chemical Industry

- a. Investment by chemical commodity; new installations; products, and processes; production figures; plans and plan fulfillment; input data; distribution; technical difficulties.

3. Fuels and Power

- a. Planned and actual production of solid fuels and electric power.

APPENDIX A

4. Manufacturing Industries

- a. Construction or expansion of industrial plants; new products and technological developments; production figures; plans and plan fulfillment.

5. Minerals and Metals

- a. Plans and plan fulfillment; investment; location and capacity of installations in use, being constructed and planned; production and consumption; manpower, prices; new technological developments.

APPENDIX A

Romania

A. Political-Sociological

1. Party and Government organization, functions, and activities at the local level; summary of party theoretical journal.
2. Organization, functions, and activities of the UTM, Women's Democratic Committee, ARLUS.
3. Subversion and sabotage; economic crimes, juvenile delinquency; changes in the penal code; police and courts activities.
4. Trade union organization, functions, and activities.
5. Statistics on students and educational facilities; workers' training; parent-school relationships.
6. Scope and content of cultural contacts; tourism, including number of persons involved.
7. Public health facilities, training of personnel, special health problems, Red Cross.

B. Military -- Same coverage as Bulgaria.

C. Economic

1. Agriculture
 - a. Areas sown to all crops, harvests, and unusual weather affecting harvests; investments in agriculture; the food processing industry.
2. Chemical Industry
 - a. New installations and products; production and distribution of chemicals.
3. Petroleum production and pipeline transportation.
4. Manufacturing and Metallurgical Industries
 - a. Plant construction or expansion; new products and technological developments; production figures.

Yugoslavia

A. Political-Sociological

1. Party developments as reported in Yugoslav periodicals, including the party journal.
2. Labor legislation and policy, organization, employment, and wages.
3. New developments in higher education, educational re-organization, educational legislation, changes in educational policy.
4. Developments in public information activities.
5. Medical facilities, activities, and personnel.
6. Standard of living.

B. Military -- Same coverage as Bulgaria.

C. Economic

1. Agriculture
 - a. Major developments.
2. Chemical Industry
 - a. Investments, production figures, new installations, products and processes; plans and plan fulfillment; ministry organization; manpower aggregates; input chemical trade figures; distribution and stock-piling wholesale prices.
3. Electric Power
 - a. Planned or actual capacity increases, distribution, allocations, and consumption of electric power; terminals of transmission lines, electric power rates; changes in organization; power shut-offs and restrictions; construction of atomic-power plants; capital investment.

C-O-N-F-I-D-E-N-T-I-A-L

APPENDIX A

4. Manufacturing and Metallurgical Industries

- a. Annual production figures; new products and technological developments; plant construction or expansion; plans and plan fulfillment; aggregate manpower; material input; production difficulties.

5. Transportation and Communications

- a. New transportation and communications facilities and equipment.

4. Far East

A. China

1. Government and Chinese Communist Party Organization with emphasis on national government and provincial party organization, including minority areas and Sino-Soviet governmental relations.
2. Technical education and education under the economic ministries.
3. Theoretical articles in the economic and political fields.
4. Political, economic, and scientific biographical data with emphasis on the provincial level, and Soviet advisors.
5. Public information and public opinion; religion.
6. Military
7. National, provincial, and selective local budgets; quarterly price reports on selective localities; investment programs on a sector or higher level; construction and production cost data; tax rates and schedules.
8. Industry -- data on specific plants as periodically clarified by end users; progress reports on major individual construction projects; monthly production reports on Wuhan, Pao-t'ou, and An-shan iron and steel combines; quarterly plans and fulfillment reports and high level criticism in heavy and light industry.
9. Major policy statements, reports, decrees, and regulations on the socialization of agriculture, commerce, and industry.
10. Crop production on provincial, harvest-season basis.
 1. Data on farm consumption and marketed production; storage, warehousing, stockpiling, seed, feed, and waste.
12. Railway transportation.
13. Telecommunications.
14. Geographic, including minorities.

15. Plans and plan fulfillments for annual or longer periods for provincial and national levels and for Shanghai, Tientsin, and Peiping.

B. Communist Vietnam

1. Policy pronouncements, laws, decrees, and regulations; party and government reports; international agreements; party and government organization; agencies of defense, foreign affairs, economic ministries and policies on the national level; selective municipal organization; military administrative committees.
2. Production for rice, coal, and manufactures (except handicraft); socialization of industry; semiannual reports on domestic and foreign trade, with emphasis on bloc assistance programs; labor and manpower; budgets and finance.
3. Political and economic biographic data.
4. Military -- all available data.

C. Communist Korea

1. Economics plans; reconstruction; bloc assistance program; population, manpower, living standards; industrial statistics and quota fulfillments.
2. Political dynamics; relationships among government and party organs; organization and function of local governments; role of mass organizations.
3. Letters to the editor, editorials, and major speeches in the Minju Chosun and Nodong Sinmun.
4. Technical education.
5. Biographic, with emphasis on lower levels.

APPENDIX A

D. Indonesia

1. Organization, policies, and activities of political parties, government agencies, mass organizations, and dissident groups.
2. Foreign relations and political penetration.
3. Military: selective exploitation of military publications.
4. Press and public information media.
5. National level economic data with emphasis on economic penetration.
6. Biographic.
7. National developments in education, health, and sanitation, and population.

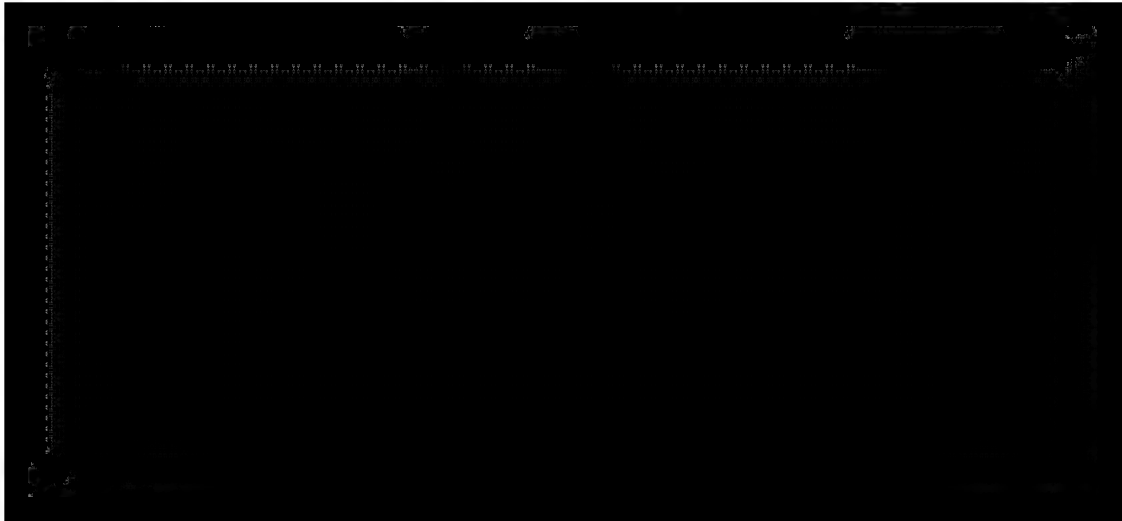

E. Thailand

1. Political: orientation in foreign relations; political penetration, political parties and local government, except Bangkok, internal security.
2. Economic: provincial agricultural, forestry, and mineral production; trade and trade agreements, emphasizing economic penetration; railways and highways; budgets and finance.
3. Sociological: minority groups; provincial level biographic information.
